

Summary

Computer Science Engineering student with a strong interest in Data Analytics and Business Intelligence. Proficient in Python, SQL, MySQL, Power BI, HTML, CSS, and JavaScript, with hands-on experience building end-to-end analytics dashboards and responsive web applications. Passionate about analyzing data, solving business problems, and continuously learning modern technologies to deliver impactful solutions.

Education

BTech

 Lovely Professional University, Jalandhar  
 2024- 2028 • Graduation • Computer Science And Engineering

 ONGC COMMUNITY SCHOOL  
 2023- 2024 • 12th

 ONGC COMMUNITY SCHOOL  
 2021- 2022 • 10th

Projects

Retail-Analytics-Dashboard

-  [Project Link](#)
- Built an end-to-end retail analytics solution by cleaning and analyzing transactional data using Python and MySQL.
  - Performed Exploratory Data Analysis (EDA) and RFM segmentation to identify customer purchasing behavior and high-value customer groups.
  - Designed a two-page interactive Power BI dashboard featuring KPIs, revenue trends, customer segmentation, and drill-down filtering.
  - Created DAX measures and Power Query transformations to support dynamic reporting and improve business decision-making.

Netflix Data Analysis Dashboard

-  [Project Link](#)
- Built an interactive Netflix Data Analysis Dashboard using Python, Dash, Plotly, and Pandas with dynamic filters for type, country, and release year.
  - Created multiple visualizations (bar, pie, line charts, histograms) to analyze movies and TV shows across different metrics.
  - Designed a responsive, user-friendly layout with tabs for insights and deployed it as a web application.

E-Commerce

-  [Project Link](#)
- Developed a responsive multi-page E-Commerce website using HTML5, CSS3, and JavaScript.
  - Built user authentication pages (Login & Signup) and informational pages (About, Contact, Order Success).
  - Implemented dynamic user interface functionality using modular JavaScript and DOM manipulation.

Tic Tac Toe

-  [Project Link](#)
- Developed a strategic Tic Tac Toe game using HTML, CSS, and JavaScript.
  - Implemented a basic AI for single-player mode to automatically respond to user moves.
  - Enhanced coding and problem-solving skills through practical exposure to AI-driven gameplay mechanics.

Skills

- HTML | CSS | JavaScript
- C Programming
- C++ Programming
- Java
- Python
- Numpy | Pandas
- Matplotlib | Seaborn
- Plotly | Plotly Dash
- DBMS
- MySQL
- Excel | Power BI
